Data sharing: understanding our open data policy

Submitting your article to a Taylor & Francis, Routledge or Cogent OA journal

A data set is associated with your paper

The example below shows the steps you’ll need to follow for journals with an open data policy

Choose a journal you want to submit your paper to

Check the data sharing policy in the journal’s Instructions for Authors

Check:
- Has the data been deposited in a repository?
- Is the data freely available under a CC BY, CC0 or equivalent license?

Pause your submission and upload data into a suitable repository

If the journal has double-blind peer review, you’ll need a repository with an option to preserve your anonymity

Ensure you include a data availability statement with your submission

Ensure associated data sets have been cited in the body of the paper and the reference list

Finalize your submission and, when you’re ready, submit your paper

Provide the DOI, reserved DOI, or other persistent identifier in the peer review system when prompted

Pause your submission and make the data open under an appropriate license

Read guidance on citing data

Data availability statement templates are available on Author Services

TAYLOR & FRANCIS’ OPEN RESEARCH JOURNEY

First Hybrid Journals Published by Taylor & Francis

First OA Articles into PubMed Central

Taylor & Francis Becomes a Publisher of Open Access Journals
